Junior Developer Analyst passionate about development and analysis of IT solutions. Skilled in Nextjs, Nodejs, MongoDB, I am known for my ability to learn quickly and work effectively in a team. My goal is to contribute to innovative projects while developing my technical and analytical skills.

Experience

Internship at MIC Belgium (Meet Innovate Create) – (2023 - 2024)
During this internship, the goal was to improve the ERP system of the company Oxygenius by using artificial intelligence as-a-service (Microsoft Cognitive Services). Specifically, the aim was to retrieve, filter, and classify attachments into different categories based on the type of email.

Oresto – (2023 - 2024)
A web application primarily designed for restaurants to showcase their culinary specialties through a menu with high-quality images, which will be accessible online by scanning a QR code.

ALDI Entrepôt Gembloux (2022 – 2024)
Retrieve store orders, stack them correctly on pallets, and ensure the warehouse remains well-organized.

Brasserie Exotique Knokke (2018 – 2021)
I was responsible for bringing dishes to the customers' tables, washing the dishes in the kitchen, and occasionally replacing the head chef to prepare certain dishes.
